

**Technology so interactive,
that it thinks along with you.**

The ZOLOG framework is an intelligent human language interface with an innovative gadget based portal. It is a result of the constant innovation focus at Adrenalin eSystems. In a day and age, when software or application users demand more ease, ZOLOG tops it up with sheer interactivity too. It powers people to do what they want, and be at their best. It is interactive, efficient and intelligent. It offers predictive search apart from type forwarding to help you work faster, smarter. Performance, now has a ZOLOG code.
